

# CQI-9

## **CQI-9 is an automotive annual self-assessment for heat treat systems**

Braddock uses the CQI-9 checklist to supplement its AS9100 accredited quality system in order to ensure efficient and problem free heat treating for all of its customers.

CQI-9 is required by automotive suppliers who purchase heat-treating services.

CQI-9 defines the fundamental requirements for heat treat management systems, addresses the process approach to automotive production, mandates an annual self-assessment and provides for continual improvement.

Braddock's quality management system meets the requirements of ISO 9001 and integrates the CQI-9 requirements to enhance its robust and mature quality system which is accredited to AS9100.

If your organization is a first or second tier automotive supplier and/or purchaser of heat treating services, you should ask your heat treater for a copy of their self assessment and their plan on corrective action progress.

If not... Braddock Metallurgical will be happy to help you with your automotive heat treat needs!
